

Scottish Neighbourhood Statistics

Finding the Statistics you need.

Thursday 30th April 2009

Paisley Town Hall

Niamh Laffan

Office of the Chief Statistician

WHAT IS THE PROJECT ?

- Scottish Neighbourhood Statistics is the Scottish Government's (SG) on-going programme to improve the availability, consistency and accessibility of small area statistics in Scotland.
- This information is being used to inform the SG's approach to improving the quality of life for people living in Scotland and especially in the most disadvantaged areas.
- Now considered as the SG's statistical flagship

SOME BACKGROUND

- AROUND 2,800 INDICATORS
- WELL OVER 1,000,000 VIEWS SINCE FEB 07 LAUNCH
- SYSTEM CONSTANTLY DEVELOPING
- CONTINUING TO PROMOTE USAGE

INDICATOR TOPICS

- Access to Services
- Community Care
- Crime and Justice
- Economic Activity, Benefits and Tax Credits
- Education, Skills and Training
- Geographic Classifications
- Health
- Housing
- Index of Deprivation
- Population
- Transport

SNS GEOGRAPHIES

- SCOTLAND
- HEALTH BOARDS (14)
- LOCAL AUTHORITIES (32)
- COMMUNITY HEALTH PARTNERSHIPS(40)
- SCOTTISH PARLIAMENTARY CONSTITUENCY (73)
- MULTI MEMBER WARDS (353)
- INTERMEDIATE GEOGRAPHY (1235)
- COMMUNITY REGENERATION CPP (28)
- COMMUNITY REGENERATION LOCAL (180)
- DATA ZONE (6505)

DATA ZONES and INTERMEDIATE GEOGRAPHY

- 6,505 DATA ZONES IN SCOTLAND
- AVERAGE SIZE 750 POPULATION
- BUILDING BLOCKS TO CREATE OTHER GEOGRAPHIES
- MATCH COA, INTERMEDIATE GEOGRAPHY AND LOCAL AUTHORITY AND BEST FIT OTHER GEOGRAPHIES
- 1,235 INTERMEDIATE ZONES IN SCOTLAND
- AVERAGE SIZE 4,000 POPULATION
- AGGREGATIONS OF DATA ZONES WITHIN LOCAL AUTHORITIES
- PROMOTING USE WHERE DATA NOT SUITABLE FOR RELEASE AT DZ LEVEL

Welcome

Scottish Neighbourhood Statistics is the Scottish Governments on-going programme to improve the availability, consistency and accessibility of small area statistics in Scotland.

This internet site is the main way in which the Scottish Government will disseminate the range of small area statistics including information on health, education, poverty, unemployment, housing, population, crime and social / community issues at the data zone level and above which support a number of the Governments targets and commitments aimed at closing the gap between disadvantaged areas and the rest of Scotland.

For more details about Scottish Neighbourhood Statistics go to [About us](#). Help on how to use the site can be found in the [User Guide](#).

Standard Reporter

The Standard Reporter gives access to a set of pre-defined reports. Each report requires slightly different input from you (e.g. choose an area, choose a topic of interest) and each guides you through providing these inputs until the final report is produced. Each report is in tabular format, all have reassurance maps and some also provide the information in chart format.

[Go to Standard Reporter](#)

Advanced Reporter

This is a flexible reporting tool that requests you to choose the geographic areas you are interested in and then the indicators. You can choose areas from a map or from a list. The list and map are linked, so you can choose an area from the map and then further refine your choice using the list. It is easy to generate lots of different reports for the same area.

[Go to Advanced Reporter](#)

Data Download

You can download a variety of information for further manipulation on your own PC. You can download all the indicators and associated data that have been updated in the last quarter or a complete copy of all the fact data showing all indicators or boundary files. You can also define your own subset of data that you wish to download using a similar construct to the Standard Reporter.

[Go to Data Download](#)

Data Guide

The Data Guide allows you to explore all the data available through the web site including a more complete description of it, who created it, who supplied it and how often it gets updated.

Download Help

Indicator Data can be downloaded either as CSV files or as XML files. The download options available to you are:

- Up to 100 Indicators: Selection of data based on Area Types, Specific Areas and Selected Indicators. You can download the data for a maximum of 100 indicators.
- Scheduled Download: Selection of data based on Area Types, Specific Areas and Selected Indicators. You can select any number of indicators for download. Your request will be processed over night and the file will send you via e-mail. You can also check the status of the download using the 'Check Download Status' button.
- Download of all the indicators updated or added in the last Quarterly Update process.
- Download of all the fact data showing all the indicators.

Despite the move to weekly publications from 04 December 2008 there are no immediate plans to change the frequency of updates to the full and quarterly downloads (i.e. once every three months) The actual dates of these updates for 2009 are:

Friday 13 February 2009

Ad-Hoc Download Help

The purpose of this facility is that professional users can download large amounts of data for further manipulation.

The first stage is to identify the Area Types and specific areas for which data is required. The first three dropdown lists are used for this. By selecting from each of these in turn and pressing the related 'Update' button you can specify your required area.

Once the areas for download have been identified, selecting data is initiated by use of the Choose Topic dropdown list and associated buttons. Depending on the choices made here further dropdown lists and lists of available indicators are displayed. Within the Topic and Sub-Topic dropdown lists:

The 'Show Sub-Topics' button will cause a lower level dropdown list to be shown below that Topic/Sub-Topic.

The 'Pick Indicators' button will cause a 'Pick Indicators' box to be populated by the indicators contained within that Topic/Sub-Topic.

Scottish Neighbourhood Statistics

The SNS Website

Scottish Neighbourhood Statistics is the Scottish Government's on-going programme to improve the availability, consistency and accessibility of small area statistics in Scotland

- [Go to the Scottish Neighbourhood Statistics website](#)

ScotStat

Scottish Neighbourhood Statistics - ScotStat

ScotStat is a network for users and providers of Scottish Official statistics. It aims to improve communication amongst those interested in particular statistics and facilitate the setting up of working groups on specific statistical issues.

Users of Scottish Neighbourhood Statistics can view examples of best practice, reference material and respond to the SNS Blog. A FAQs section is also available:

- [SNS Blog](#)
- [Work Group](#)
- [Best Practice](#)
- [Events](#)

Scottish Neighbourhood Statistics

ScotStat Register

The [ScotStat register](#) allows users and providers of Scottish Statistics to record their interest in specific topics. The register will then be used to target those interested in a particular statistical area:

- To consult on new collections,
- To seek views on changes to existing collections and
- To provide notification of new or forthcoming publications.

There is a specific topic for Neighbourhood Statistics.

SNS: Access to Services - Proposed Data Update

Thursday, November 1, 2007

Access to services data currently available on SNS, comes from two sources namely the Availability to Rural Services report published in October 2002 and

the drive times to key services, Primary and Secondary Schools, GP's, Post Offices, Petrol Stations and Retail Centres, from SIMD 2006 (please see the SIMD technical note for full details www.scotland.gov.uk/simd2006technical). This information can be used to identify areas in which access to services is poor, assess location and characteristics of people with restricted access to essential services, improve access to services for excluded groups/communities. However, we would like to update this data and standardise the way we assess them in terms of drive-times and public transport times to these locations as of 2007.

We would welcome comments on these proposals and, in particular, the choice of key services chosen.

Thanks
SNS Team

Comments

■ 1. Jennifer Boag - Falkirk Council

Monday, December 17, 2007 10:05

I agree that there is a need to update the data in particular as facilities open and close - current proposals to close Post Offices are perhaps the most obvious example.
On that, we used the access data in our reponse to the Post Office on the closures in our area.
I would welcome further information on the public transport times as I think we ought to be looking at frequency of services as well

■ 2. Bob Stead - West Lothian Council

Friday, December 21, 2007 10:29

Statistics

What about changes...

You can find out further information about corrections and known faults, as well other important information, within the News page of the main [SNS website](#).

Did you know...

The decision to add or delete indicators rests with the data provider involved and not the SNS team. If you are concerned that an indicator may have been deleted or is no longer being updated, you may be able to confirm by using the contact details included in a related indicators metadata. If contact details are missing, contact the

1. What does the SNS site allow users to do?

The SNS Internet is highly interactive and innovative and allows users to:

- View a standard set of indicators for a set of pre-defined geographies.
- Define their own geographic areas of interest.
- View pre-defined reports on specific topics for their areas of interest.
- Define customised reports from the full range of indicators available.
- View their reports geographically through thematic maps.
- Cut and paste and print the results.
- Allow users to save their work sessions.

2. What small area data gaps have been filled by the SNS initiatives?

There has been significant developments in almost all topics, some of the most notable include:

- Deprivation - The Scottish Government's Index of Multiple Deprivation.
- Education - The SNS has contributed to the development of the ScotXed database which includes pupil level data has allowed data to be aggregated to small area levels.
- Benefits - We have developed with the Department of Work And Pensions a range of key benefit and tax credit indicators.

3. Are there any major small area data gaps in the topics covered?

There are still small area data gaps to be filled. The gaps users have identified as priority are the demographic, crime, community well-being and housing topics. We are continuously looking to develop the range of indicators included and always welcome the views of users.

4. What developments have been made to the SNS site over the last year?

The main developments have included:

- The introduction of the data zone geography and a tidy-up of the ad-hoc geographies previously held on the site.
- Improvements to the background mapping to allow users to more easily use the mapping to locate their areas of interest.
